Tell us about Your Motivation regarding SIH2017	<p>In a country where you may find many people around us complaining, blaming about the system and working of our Government, we are having people which is very close to negligible who are willing to solve the problems. Rather than dwelling and pondering on the system we thought of making a move and solve it which will benefit the whole nation. Smart India Hackathon was such a noble idea taken by the Government toward the nation building. This kind of movement was expected sooner or later. We are motivated by the fact that we have to join our hands and take successive actions toward digital India and we still dream of it.</p>		

Share Your Experience (200 words)	It was a great experience visiting a different state and participating in such a grand event and it's a matter of pride to be a part of largest digital movement. Meeting great innovators from all over the country was such a perk. And the Industrial mentor were quite helpful and we couldn't be more grateful for this.
Most Memorable incident during SIH2017	Two memorable moments we would like to share. <ol style="list-style-type: none"> 1. Our first mentor session was pretty much helpful for us. That was our first kick and the only reason why we could overcome many of the loopholes in our project. 2. After the long 17 hours of hacking and brainstorming sessions, Zumba Dance and the shot of the Red bull was out of the blue. It was the quintessential booster needed at that late night.
Achievements (100 words)	Winning and losing are both the part of a game and our team knows it very well. Sure enough we couldn't win the competition but we did win many other things like lessons, learning, knowledge, honor, dignity, respect and tons of experiences which is something very priceless to us. This is something we have achieved in these two day, which will be forever memorable to us.

Tell us about Your Motivation regarding SIH2017	It was motivational and encouragement for all the youth who have participated in Finale of SIH 2017.		
Share Your Experience (200 words)	To much innovation in a single event.The world is looking at us for the NEXT BIG IDEA, and there cannot be a better time than now to Make India DIGITALLY SMART. Taking the power of Digital Transformation to the next level, SMART INDIA HACKATHON '17 is India's platform for a DIGITALLY EMPOWERED NATION.PM Narendra Modi addressed Smart India Hackathon 2017 via video conferencing. Speaking at the event, the PM said, "Technology lays the foundation stone for the future." He added that technology has made things simpler and easier. Motivating the youngsters at the hackathon, PM Modi said that they are blessed with phenomenal energy and this energy will bring very good results for the nation.		
Most Memorable incident during SIH2017	Motivational speech from honorable Prime Minister , Shri , Narendra Modi.		
Achievements(100 words)	Participation in the Grand Finale of SIH 2017 is the biggest achievement in all our life.
